

**INNOVATION CHALLENGE “LUCIO MASTROBERARDINO”****NEW TECHNOLOGY SIMEI 2017****LALLEMAND GMBH - MALOTABS**

They are selected *Oenococcus oeni* active bacteria in tablet format for a safe and simple inoculation with a highly active bacterial culture. The formulation of malolactic bacteria, named “Malotabs”, does not introduce a substantial change in the wine-making process, but it allows a simplification in the inoculation procedures of malolactic fermentation, when it is conducted in small barrels or containers of a limited size.
